WORK EXPERIENCE

Logiscool Aparatorii Patriei

City: Bucharest | **Country:** Romania

[01/09/2022 – 30/06/2024] **Technology Instructor**

Teaching programming courses using the Logiscool method in the educational platform - Scoolcode - based on the curriculum and lesson plan developed by Logiscool.

Responsibilities:

Presenting the concepts and projects included in the lesson plans so that students can understand what they are being taught. Presenting the concepts and projects included in the lesson plans so that students can create a pleasant and friendly working atmosphere for the pupils but keeping a group discipline (with the help of the school co-ordinator where appropriate) following and teaching all the concepts included in the lesson plan in question so that fit exactly into the 90-minute time limit (without going into the next lesson plan).

Giving constant feedback to the school coordinator about students (who is not paying attention, who is very fast and advanced, who disturbs the class etc) preparing laptops and class before and at the end of class (closing laptops, seating, throwing away papers & cups left in the classroom)

Electronic Arts Romania

City: Bucharest | **Country:** Romania

[01/07/2024 – 08/08/2025] **Application software tester**

Software Tester

Responsible for planning, executing, and documenting various test processes to ensure the quality, functionality, and reliability of software applications. Key tasks include designing test cases, performing manual and automated testing, identifying and reporting defects, and collaborating with developers and project teams to resolve issues. Demonstrated expertise in functional, regression, performance, and user acceptance testing (UAT). Proficient in using testing tools and methodologies like Agile and Scrum to enhance product quality. Strong analytical skills, attention to detail, and effective communication to report findings and ensure software meets business and technical requirements.

Key Responsibilities:

- Develop and execute test plans and test cases.
- Perform functional, regression, and performance testing.
- Identify, document, and track defects using issue-tracking tools (e.g., JIRA, Bugzilla).
- Collaborate with developers and stakeholders to resolve issues and improve product quality.
- Automate test scripts using relevant tools (e.g., Selenium, Postman).
- Participate in Agile/Scrum teams, attending daily stand-ups and sprint planning meetings.
- Conduct user acceptance testing (UAT) and ensure software compliance with user requirements.

Skills:

- Manual and automated testing expertise
- Familiar with testing tools (e.g., Selenium, JIRA, Postman)
- Knowledge of software development life cycle (SDLC)
- Strong problem-solving and critical-thinking abilities
- Excellent communication and collaboration skills
